Architectural Collections

Redefining Modern Hardware

Knk are proud to present their range of architecturally designed quality, stylish door furniture and accessories. This hardware compliments the high standard of architectural homes in New Zealand.

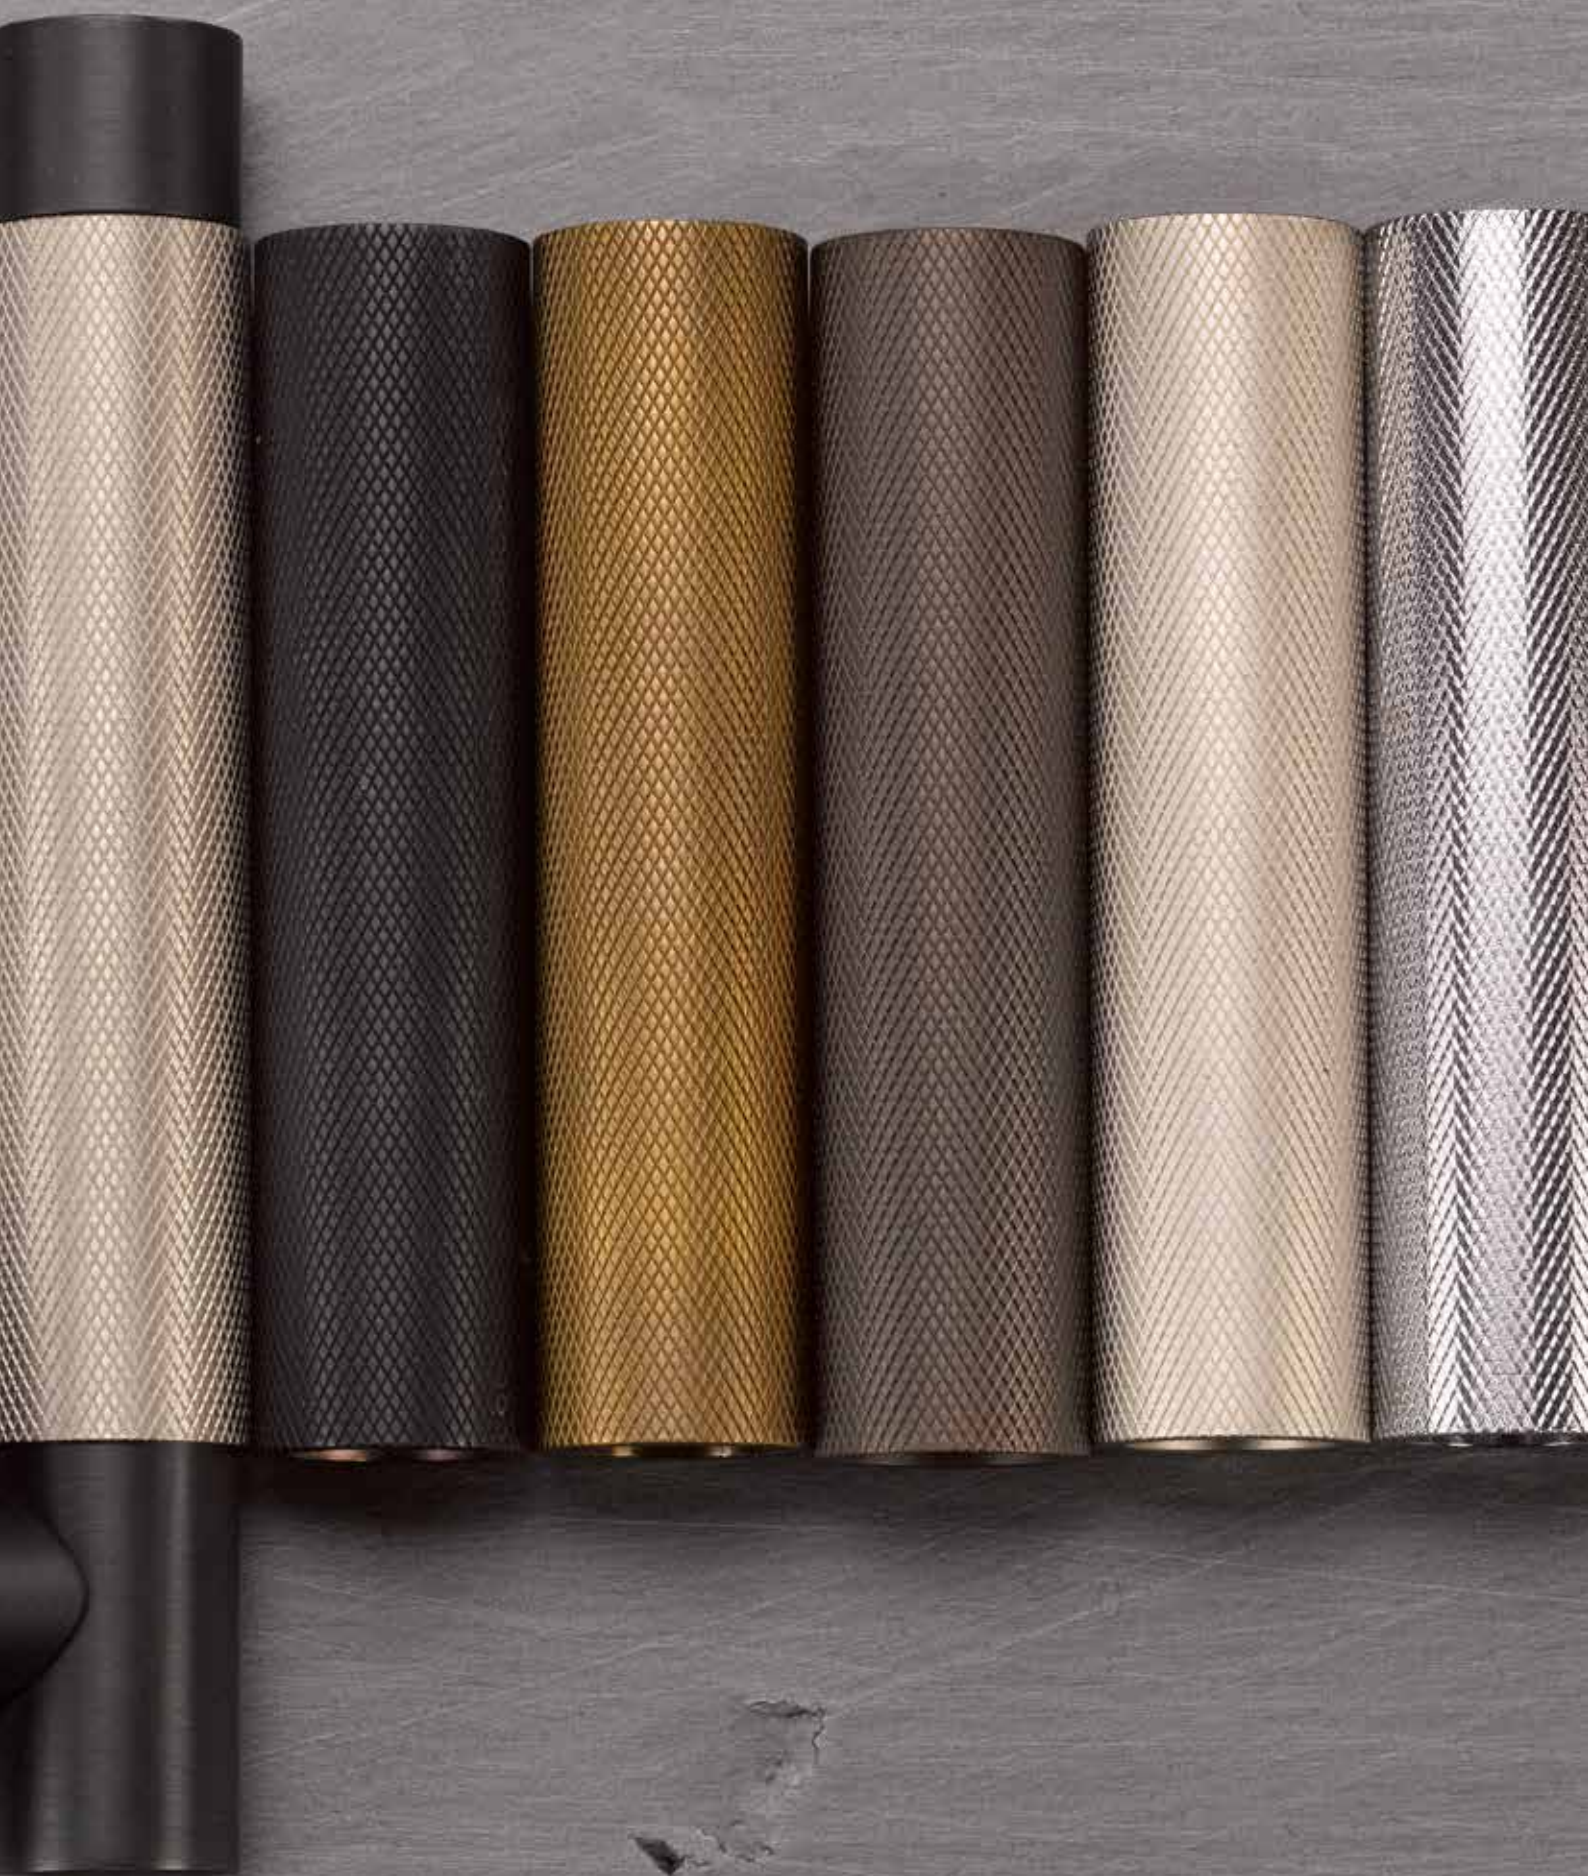

Our discerning customers demand distinctive style and quality whilst looking for that 'point of difference'.

To meet and exceed this expectation we have created our 'Architectural Collections' range.

Whether it be residential or commercial applications, KnK have provided complete solutions for more than 25 years.

We invite you to peruse our range of high quality locally and internationally sourced hardware to create the finish and style you are seeking.

As well as the Hardware in this brochure coming from the best suppliers in the world. KnK Hardware sells the best products from New Zealand.

FERARRO

THE ARCHITECTURAL RANGE

Fresh Modern Look in Architecture NZ

Architectural Designs - Subtly Accentuate and Enhance

The Architectural Range - By Ferarro

The Architectural Range by Ferarro has been designed for the modern home. After extensive research Ferraro have developed The Architectural Range with four modern stainless steel handles that subtly accentuate and enhance their surroundings.

The Minimo 3mm sprung rose sits neatly against the door creating a feeling of luxury. This gives you the best technical and aesthetic solution possible when paired with a smooth soft close latch and ergonomic handle.

FERARRO

ANODISED ALUMINIUM RANGE

Designer products at affordable prices

Benefits of Using Anodised Aluminium

ANODISING

Anodising is a metal finishing process used to give aluminium a stronger surface which is very hard and exceptionally wear-resistant. It is essentially a controlled procedure produce a uniform and dense layer on the handle.

Unlike other finishes like powder coat or electro-plating, which can flake off or chip, anodised finishes are actually formed from the original material.

LIGHTWEIGHT

The unique aspect of the aluminium handle is that it is light compared to what it provides in robustness and strength. Aluminium is utilised in aerospace and motorsports engineering because of such attributes. Because of its light weight, it reduces the wear on the springs and door latch, extending the life of the product.

The Ferraro Anodised Aluminium handles are hand case from high-quality virgin aluminium. They outlast similar products which are made from other materials

EASY MAINTENANCE

A considerable advantage to the majority of property owners is that they won't need to maintain Anodised Aluminium handles. Aluminium handles don't corrode, resist rust and tea staining.

It makes them perfect for use in all weather conditions, even in locations near the sea. Anodised Aluminium handles stand any climatic condition and weather element, including extreme resistance to sunlight

Frascio Italian Hardware

Frascio represents a reality, always able to renew itself and look to the future, thanks to continually updating in the field of design, bioarchitecture and innovation. Frascio pays special attention to new processing techniques and the use of the newest ecological materials and finishes. They renew themselves whilst remaining faithful to traditions, maintaining a perfect equilibrium between the productive force of a big company and the wisdom of an artisan's care of the product.

The high attention to detail in finishes and the range of materials used represent the uniqueness and strength of our production.

A sign of our constant attention to the development of the newest finishes is highlighted in our history. In the early '80s we introduced the use of Pvd technologies for handles and today to celebrate this by introducing new chromium plated handles which are ecological and non toxic.

BATHROOM ACCESSORIES & TAPWARE

Designer products at affordable prices

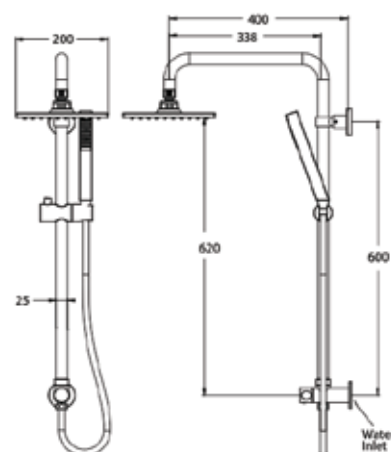

Choosing the right shower for your bathroom is not just about good looks and design, it's also important to recognise the function you want it to perform in order to get the best possible result. It's about form + function, + the Project Range offers something for every consideration.

Project Shower Columns offer the functionality of a swivel head for the unit along the standard wall rail. All products in the collection of rail showers have handsets that can be lifted and used as a hand shower which can be used to clean the body and the shower recess.

Shower columns offer the functionality of a fixed-point shower with the versatility of a moveable handshower.

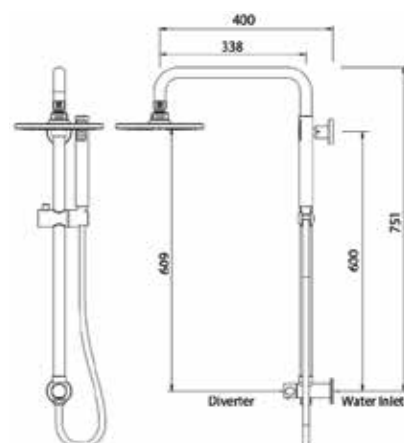

Scondro Shower Column
FZRBDU25A-990A286-SQ/B

- > Super Smooth Rail System
- > Single Function - Square Shower Heads + Handshower
- > 3 Star - Wels 6 / 6.5 Litres
- > Bottom Water Inlet

Rondo Shower Column
FZRBDU25A-976A283-RD/B

- > Super Smooth Rail System
- > Single Function - Square Shower Heads + Handshower
- > 3 Star - Wels 6 / 6.5 Litres
- > Bottom Water Inlet

Choosing the right shower for your bathroom is not just about good looks and design, it's also important to recognise the function you want it to perform in order to get the best possible result. It's about form + function, + the Project Range offers something for every consideration.

Project Shower Rails offer the functionality of adjustable height for the unit along the standard wall rail. All products in the collectino of rail showers have handsets which can be used to clean the body and the shower recess.

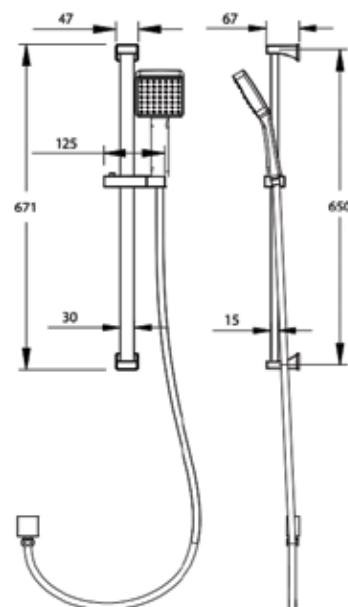

Hand showers offer the functionality of a fixed-point shower with the versatility of a moveable showerhead which can be used to clean the body and the shower recess.

METALCRAFT ROOFING

Operating since the 1950's and originated in the lovely town of Palmerston North. With more than 50 years experience in the industry, we have established a reputation for both manufacturing high quality roll formed products and for providing an unrivaled level of service.

www.metalcraftgroup.co.nz

METALCRAFT INSULATED PANELS

Specialises in the manufacture, supply and installation of insulated panels.

www.metalcraftgroup.co.nz

UNITED STEEL

Sources a full range of products from a network of Australasia and South East Asian leading steel producers – sections, beams, channels, plates and structural steel destined to form the backbone of many of the country's major engineering and construction projects. Drawing on the expertise of some of the steel industry's most experienced people, the United Steel team prides itself on making the specification and use of steel as simple and economical as possible. United Steel specialises in the manufacture and distribution of reinforcing bar and welded mesh for building and construction projects. Two new state-of-the-art mesh welders provide increased production flexibility, quick response times and competitive pricing on short call orders. With five distribution centres nationwide carrying a comprehensive range of reinforcing bar and mesh, United Steel is there to meet the industry's reinforcing needs.

www.unitedsteel.co.nz

PIPES NZ

New Zealand's specialist provider of steel pipe and has an extensive stock of associated high and low pressure, flanges, bends and fittings. Pipes NZ through long standing relationships with leading global steel mills, is able to obtain the highest quality material available in the market, within the best possible lead times.

www.pipesnz.co.nz

MILLIER REINFORCING

Specialises in the fabrication and installation of reinforcing steel and mesh for all building projects. Millier Reinforcing carries a stock of steel reinforcing material, produce customised orders from construction drawings and perform on-site placement.

www.millierreinforcing.co.nz

REOFAB

Specialises in the fabrication, supply, cut, bend and delivery of reinforcing steel and the supply of reinforcing mesh for large building projects. ReoFab carries a stock of steel reinforcing material, produce customised orders from construction drawings and perform on-site placement for the Auckland Region. They are considered New Zealand's expert suppliers and fabricators of reinforcing steel with an outstanding reputation for providing quality product on time for many of the country's building projects.

www.reofab.co.nz

AKARANA TIMBERS

Stock a full range of timber and landscaping products and produce an excellent range of quality pre-nail framing and trusses. Akarana Timber offers a free estimate on house plans and specialises in house-lot orders. Every sale is backed with unparalleled customer service and advice.

www.akaranatimbers.co.nz

PIPEMAKERS NEW ZEALAND

Pipemakers imports and distributes PVC-U and PVC-M pressure, DWV, stormwater, electrical ducts, conduit and fittings to the merchant and fabrication customer base. The PVC pipe and fittings are mainly produced in our sister company operations in Melbourne and Lautoka, both of whom enjoy the prestigious AS/NZ Standards Accreditation along with the "Five Ticks Quality Endorsed Company" status for the Melbourne operation.

ZETA WINDOW & DOOR

Zeta Window & Door manufactures aluminium joinery utilising the Omega designer system. Zeta designs and manufactures aluminium windows and doors to fit any residential or commercial application. Working closely with Akarana Timbers, Zeta is able to offer outstanding customer service and has built a reputation for quality.

IMBMS

IMBMS specialises in providing rebar splicing solutions to large scale construction projects nationwide. The IRON-MAN BMS Rebar coupler system that we supply has been utilised on thousands of high-profile projects worldwide such as the Burj Khalifa (tallest Building in the world) in Dubai, The Marina Bays Sands Integrated Resort in Singapore, the Çanakkale 1915 Bridge in Turkey and the City Rail Link Project in Auckland. With our high-performance system, quick response times, specialist engineering support and excellent reputation, IMBMS are rapidly becoming the No.1 choice for contractors and engineers in NZ.
