

## Door Hardware Collection

The Tasman Forge door hardware collection has been designed to enhance any door, where the elegance and timelessness of the handles enables them to complement any design statement.

Fundamental to our craft is a meticulous attention to detail throughout the design process, using time honoured methods of blacksmithing and fine craftsmanship to create truly individual pieces. All the handles in our collection are hand cut, hand forged, and hand finished to create a natural aged appearance. This process is what sets our handles apart from other mass produced products and as a result slight differences are inherent in each and every piece adding to the character and individual feel of our products. Once installed, the effects of age, climate and touch will work together to create unique, contrasted colour variations.
